

Three dimensional diagram of photovoltaic panel recycling production line

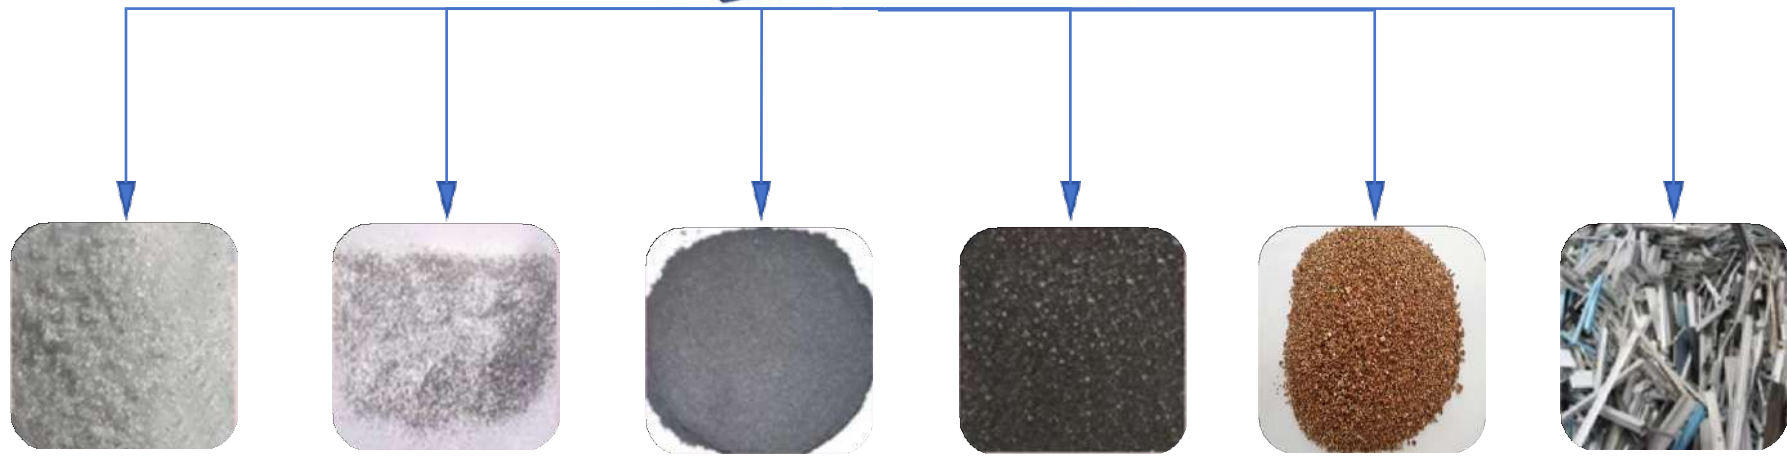

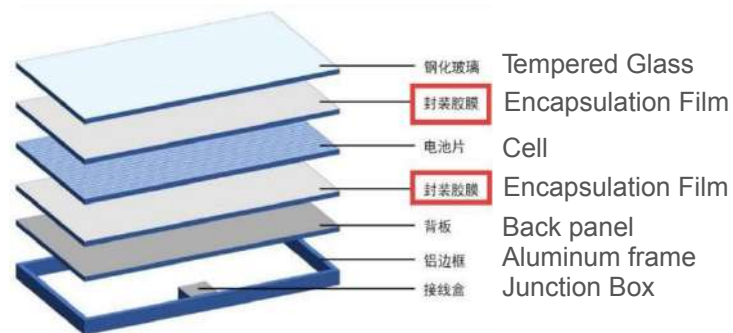

光伏板回收产线三维图：

Process Flow Chart of Semi-automatic Single-glass PV Panel Recovery Production Line

半自动单玻光伏板回收产线工艺流程图：

玻璃微粒 71.2%
Glass particulate matter

银 0.8%
silver

硅粉 5%
Silica fume

塑料 10%
plastic

铜 3%
copper

铝框架 10%
Aluminum frame

注：光伏板中还含有少量铟、镓等稀有金属，占比约 **1%**，这些金属在光伏板中的含量虽然很少，但价值却很高。

Note: The PV panel also contains a small amount of rare metals such as indium and gallium, accounting for about 1%. Although the content of these metals in the PV panel is small, the value is very high.
